Every innovation that has every started out, always started as creepy. And then it becomes the norm. When the internet came out, people resisted to putting their credit cards online. And then everybody did. When the Facebook newsfeed came out, people were disturbed with how much content people could see of each others lives. But everyone still got Facebook. Everyone has sold something on Kijiji or Craigslist, despite the fear of there person they may be interacting with may be dangerous.

The reason why this is happening is because we choose efficiency over trust, 100%.
Quality Service Innovation Professionalism Commitment

Immediate opening for a Forestry Technician – Prince George BC.

We are seeking to hire an experienced, full-time employee to join our team in Prince George, BC. We offer competitive compensation and opportunities for professional growth.
