Climate Change & Forest Management: What are the impacts & what are we doing about it?

Who should attend?

Practitioners interested in how climate change has and will continue to impact various aspects of forest management.

What topics will be covered?

A diverse lineup of speakers from industry, government and the scientific community will share their expertise on:

- How Climate Change can be assessed in relation to forest management
- How Climate Change can be considered and incorporated into forest management planning
- How carbon is considered
- How wildfire management and Climate Change are related
